## SUMMARY

Seeking a beginner role to enhance and explore my technical knowledge gained at SABAC College in the last four years. I hold a BS (CS) degree from The University of the Punjab. I am using HTML5, CSS3 and JavaScript in front-end and Node.js in back-end.

## EDUCATION

The University of the Punjab

**BS (Computer Science)**/OCT2016-MAR2020

Govt. College of Science, Wahdat Road, Lahore

**F.Sc. (Pre-Engineering)**/AUG2014-SEP2016

Govt. Pilot Secondary School, Wahdat Colony, Lahore

**Matriculation (Science Group)**/APR2012-JUL2014

## PROJECTS

**Real-time Chat Application**/NOV2021-Present

This is a real-time chat application in which we can communicate with each other as a group. This application is created by using node.js, express.js and socket.io. In future I will add date and time feature.

**Analog Clock**/NOV2021-NOV2021

This is an analog clock which is made by using HTML5, CSS3 and JavaScript.

**Login Form**/AUG2021-Present

This is a login form project which is made by using HTML5 and CSS3. I make it semi-transparent with the help of pseudo selectors. I also use animation and transition to make it beautiful. In future I will connect it with database to store data.

## INTERESTS

1. Video Games
2. Chess
3. Badminton
